ROCK GARDEN and DWARF PLANT LIST

LA ROCHETTE NURSERY

1195 Stanyan Street
San Francisco 17
California
LOmbard 6-2929

This leaflet represents the first listing of dwarf plants grown at the La Rochette Nursery. names used conform to those in Hortus Sec wherever possible and the absence of popular names is due to our attempt to prevent confusion.

Practically all of the following plants are grown in four-inch pots and with the exceptions noted in the text are all priced at 50¢ each, at the nursery. We have found that this type of plant material transplants better over a longer season when pot grown and consequently, we do not offer dug plants. All plants not in stock at times.

This list has been compiled primarily for the advanced gardener but reference to the descriptions in Hortus Second will usually suffice.

The descriptive coding is based on conditions in San Francisco and gardeners in areas other than the San Francisco Bay Region should interpret them with their own local conditions in mind.

1-24 height in inches (inflorescence excepted)
* - easy, no special culture

ABBREVIATIONS

- | | |
|-------------------|--------------------|
| Ac - acid | Inv - invasive |
| Blb- bulb | M - moisture |
| Cl - clumping | Shr - shrub |
| Car- carpeting | Succ - succulent |
| Cr - creeping | Sun - sun |
| De - deciduous | T - tender |
| Dr - drainage | Tr - trailer |
| Ev - evergreen | U - shade |
| Herb - herbaceous | 1/2 U - half shade |

 " " *tomentilla* " " "

An assortment of Dwarf Ferns and Conifers is stocked at the nursery.

A variety of shrubs including new and rare Rhododendrons and interesting vines are also grown but LA ROCHETTE NURSERY is primarily known for its FUCHSIAS. Our new introductions and general list of fuchsias available on request.
